PRACTICAL :**

**Max. Marks: 100
Max. Marks: 100**

Discipline Centric Core Course (DCC Course)

ZOO5001T - Animal Diversity & Evolution

Learning objective of the course

The course for the Animal Diversity & Evolution is dealing with the diversity, principles of systematics and categorization of invertebrate organisms.

Functional morphology of the types included with special emphasis on the adaptations to their modes of life and environment. General characters and classifications of all invertebrate phyla up to class with examples emphasizing their biodiversity, economic importance and conservation measures where required.

Unit 1: General principles of taxonomy, concept of the five-kingdom, Concept of Protozoa, Metazoa and Levels of organization. Basis of classification of non-chordata: Symmetry, coelom, segmentation and embryogeny, Characters and Classification of Protozoa and Porifera upto classes with examples.

Unit 2: Salient features and classification of Coelenterata, Ctenophora, Platyhelminthes, Aschelminthes, Annelida, Arthropoda, Mollusca and Echinodermata with their suitable examples.

Unit 3: Origin of Life, Miller's experiment, Lamarckism and Darwinism, Natural Selection, genetic basis of evolution, speciation, Evidences of organic evolution.

Unit 4: Variations, Isolation and Adaptations, Geological time scale and animal distribution in different era.

Unit 5: Principal zoogeographical regions of the world with special reference to their mammalian fauna, Factors affecting the large scale animal distribution, Origin and evolution of man.

ZOO5001P Practical

1. Diagrammatic representation of dissections :

Annelida- Pheretima : General anatomy and nervous system

Arthropoda- Periplaneta : General anatomy and nervous system

Palaemon: General anatomy and nervous system

Mollusca- *Pila*: General anatomy and nervous system

Lamellidens /Unio: General anatomy and nervous system

Professor & Head
Department of Zoology
Faculty of Science
J.N.V. University, Jodhpur

2. Identification, systematic position up to order and general study of the following animal forms, microscopic slides / museum specimens:

Protozoa: [Whole mounts] *Amoeba*, *Entamoeba*, *Euglena*, *Noctiluca*, *Trypanosoma*, *Trichomonas*, *Foraminifera* (Oozes), *Opalina*, *Balantidium*, *Nyctotherus*, *Paramecium*, *Paramecium* binary fission and conjugation and, *Vorticella*.

Porifera: *Leucosolenia*, *Grantia*, *Scypha*, *Hyalonema*, *Euplectella*, *Spongilla* and *Euspongia*

Coelenterata: *Obelia* (colony and medusa), *Physalia*, *Porpita*, *Aurelia*, *Rhizostoma*, *Alcyonium*, *Corallium*, *Gorgonia*, *Tubipora*, *Pennatulilla* and *Madrepora*

Ctenophora: *Beroe*

Platyhelminthes: *Dugesia*, *Fasciola* and *Taenia*

Nematoda: *Ascaris*, *Ancylostoma*, *Dracunculus*, *Wuchereria*, *Trichinella*, *Schistosoma* and *Enterobius*

Annelida: *Nereis*, Phase Heteronereis, *Aphrodite*, *Arenicola*, *Pheretima*, *Pontobdella*, *Branchellion* and *Hirudinaria*

Onychophora: *Peripatus*

Arthropoda : *Limulus*, *Araneus*, *Palamnaeus*, *Apus*, *Lepas*, *Balanus*, *Sacculina*, *Palaemon*, *Lobster*, *Eupagurus*, *Carcinus*, *Lepisma*, *Odontotermes*, *Pediculus*, *Schistocerca*, *Papilio*, *Bombyx*, *Xenopsylla*, *Apis*, *Julus* and *Scolopendra*

Mollusca: *Chiton*, *Dentalium*, *Patella*, *Pila*, *Turbinella*, *Aplysia*, *Slug*, *Snail*, *Mytilus*, *Ostrea* (pearl oyster), *Lamellidens*, *Teredo*, *Nautilus*, *Sepia*, *Octopus* Enchinodermata: *Pentaceros*, *Asterias*, *Ophiothrix*, *Echinus*, *Holothuria* and *Antedon*

ZOO5002T: Biology of Non chordates

THEORY :

Max. Marks: 100

PRACTICAL :

Max. Marks: 100

Discipline Centric Core Course (DCC Course)

ZOO5002T: Biology of Non chordates

Learning objective of the course

The course for the biology of non-chordates is dealing with the categorization of non-chordates organisms from unicellular to multicellular with different grading of body forms.

Unit 1: *Euglena*: Ultrastructure of flagellum and flagellar movement, osmoregulation and behaviour, reproduction.

Paramecium: Locomotion, nutrition, osmoregulation and reproduction. *Sycon*: Cellular organization, canal system, reproduction and development.

Unit 2: *Obelia*: Structure of polyp and medusa, sense organs and reproductive systems, life cycle.

Fasciola: Digestive, excretory and reproductive systems, developmental stages and life cycle.

Taenia: Structure of body wall, excretory and nervous systems, reproduction and developmental stages in life cycle.

Unit 3: *Nereis*: Parapodial locomotion, digestive, blood vascular, excretory, nervous and reproductive systems, development and metamorphosis.

Hirudinaria: Digestive, haemocoelomic, excretory, nervous and reproductive systems, sense organs.

Unit 4: *Palaemon*: Appendages, Digestive, respiratory, blood – vascular, excretory, nervous, sense organs and reproductive systems.

Pila: Digestive, respiratory, blood vascular, nervous and reproductive systems, sense organs

Unit 5: *Lamellidens*: Digestive, respiratory, blood-vascular, excretory and nervous systems, sense organs, reproduction and development.

Asterias: Water – vascular system, digestive, circulating and nervous systems, sense organs, reproduction, life history and regeneration.

ZOO5002P: Practical

I. Study of sections, developmental stages and isolated structures (microscopic slides)

Porifera: L. S. and T. S. of *Scypha* / *Grantia*

Coelenterata: *Hydra*, Sections of *Hydra*, Developmental stages of *Aurelia*

Platyhelminthes: Transverse sections of *Dugesia*, *Fasciola* and *Taenia*, mature and gravid proglottids of *Taenia*, developmental stages of *Fasciola* and *Taenia*

Professor & Head
Department of Zoology
Faculty of Science
J.N.V. University, Jodhpur

Annelida: Transverse sections of *Nereis* and *Hirudinaria*, Trochophore larva of *Nereis*, Parapodium of *Nereis* and *Heteronereis*

Arthropoda: Crustacean larvae (*Nauplius*, *Zoea*, *Megalopa* and *Mysis*), mosquitolarva & pupa.

Mollusca: Transverse sections of *Lamellidens* and Glochidium larva.

Echinodermata: Pedicellariae of Star fish.

a. Study of living *Paramecium*

2. Permanent preparations : (i) Protozoa : *Paramecium*/ *Euglena*

(ii) Porifera : Sponge spicules spongin fibers, gemmules

(iii) Coelenterata : *Obelia* colony

3. Diagrammatic representation of nervous system of pila and unio

ZOO6001T : Biology of Non chordates

THEORY :

Max. Marks: 100

PRACTICALS :

Max. Marks: 100

Discipline Centric Core Course (DCC Course)

ZOO6001T : Chordate Structure and Function

Learning objective of the course

The course for the Taxonomy of chordates is exchanging the knowledge about with the principles of systematic and categorization of vertebrate organisms including their structure and function.

Unit 1: Classification and characters of phylum Chordata (excluding extinct forms) up to orders, Comparisons of habit, habitat, external features of *Balanoglossus*, *Herdmania* and *Branchiostoma* (excluding development).

Unit 2: Ascidian tadpole larva and its Metamorphosis, Affinities of Hemichordate, Urochordate and Cephalochordates. Habit, Habitat and salient features of *Petromyzon* and *Myxine* Ammocoete larva.

Unit 3: Integument including structure and development of placoid scales, feathers and hairs, Jaw suspensorium, limbs and girdles of *Rana*, *Uromastix*, *Columba* and *Oryctolagus*.

Unit 4: Heart and aortic arches, respiratory system and alimentary canal of *Scoliodon*, *Rana*, *Uromastix*, *Columba* and *Oryctolagus*.

Unit 5: Brain, urinogenital system (*Scoliodon*, *Rana*, *Uromastix*, *Columba* and *Oryctolagus*), Identification of poisonous and non poisonous snakes. Biting mechanism in snakes, flight adaptations in birds. Adaptations in aquatic mammals.

ZOO5002P Practical

1. Diagramatic Representation:

Major Scoliodon : General anatomy, alimentary canal

Minor afferent and efferent blood vessels, urinogenital system, brain and cranial nerves – V, VII, IX and X only and internal ear Brain V, VII, IX and X Cranial nerves, afferent and efferent blood vessels, air sacs, and internal ear.

2. PERMANENT PREPARATIONS

Scoliodon: Placoid scales, Ampulla of Lorenzini.

3. Identification, systematic position and comments of the following animals:

Cephalochordata: *Amphioxus*, Hemichordata: *Balanoglossus*

Urochordata: *Salpa*, *Doliolum* and *Herdmania*

Cyclostomata: *Petromyzon* and *Myxine*

Pisces: *Zygaena*, *Scoliodon*, *Pristis*, *Torpedo*, *Trygon*, *Protopterus*, *Labeo*, *Heteropneustis* (*Saccobranchius*), *Belone*, *Exocoetus*, *Anabas* and *Echeneis*

Amphibia: *Necturus*, *Amphiuma*, *Amblystoma*, *Axolotal* larva, *Hyla*, *Uraeotyphlus*

Professor & Head
Department of Zoology
Faculty of Science
J.N.V. University, Jodhpur

Reptilia: *Trionyx, Chelone, Varanus, Uromastix, Ophiosaurus, Naja, Bungarus, Echis, Hydrophis, Eryx, Ptyas, Crocodilus and Gavialis*

Aves: *Columba, Pavo, Choriotis, Francolinus, Streptopelia*

Mammalia: *Meriones, Funambulus, Rattus, Hemiechinus, Suncus, Pteropus, Presbytis* and *Macaca*

4. Microscopic Study

Hemichordata: Section through proboscis and branchiogenital region *Branchiostoma*: T.S. oral hood, pharynx, gonads, intestine and caudal region *Scoliodon*: T.S. gill and scroll valve

Rana: T.S. through various organs, T.S. and L.S. of developmental stages

Reptilia: V.S. skin of lizard

Aves: V.S. skin, different types of feathers

B.Sc. IIIrd Semester

ZOO6001S (SEC) : Zoology: Skill Course I – Vermitechnology

(30 hrs.)

THEORY :

Unit 1: General characteristics of earthworms; earthworm species diversity; ecological categories of earthworms.

Unit 2 : Breeding and culture methods; vermicomposting; chemical and biological properties of vermicompost.

Unit 3 : Use of earthworms in agricultural, industrial and household waste management; designing of various types of vermireactors.

PRACTICAL :

1. Study of systematic position, habit, habitat and external features of an earthworm species and its life cycle.
2. Preparation of vermiculture; maintenance of culture.
3. Preparation of vermicompost.

Suggested Reading Materials (All latest editions)

THEORY :
PRACTICAL :

Max. Marks: 100

Max. Marks: 100

Discipline Centric Core Course (DCC Course)

ZOO6002T : Developmental Biology

Learning objective of the course

The course for the developmental biology of vertebrates is exchanging the knowledge about with the developmental processes and various events of development.

Unit 1:History and basic concepts of Embryology - Gametogenesis: Spermatogenesis and oogenesis, Structure and types of eggs and sperms. vitellogenesis

Unit 2: Fertilization – Main events of fertilization : Acrosome reaction, Polyspermy preventing mechanisms, Cleavage : Planes, patterns and types of cleavage. Blastulation: Types of blastulae Significance of cleavage and blastulation.

Unit 3: Gastrulation-Fate maps, morphogenetic cell movement and their significance in gastrulation. Development of *Branchiostoma (Amphioxus)* up to gastrulation; chick egg and its development up to the formation of primitive streak.

Unit 4: Extra embryonic membranes of chick. Placentation: definition,types, classification on basis of morphology & histology and functions of placenta. Development of placenta in rabbit.

Unit 5: Organogenesis of alimentary canal, eye and kidney, gonads and brain in mammal.

ZOO6002P : Developmental Biology

1. Study of Chick embryology: Whole mounts of embryos of 18, 24, 28, 33, 36, 48 and 72 hours.
2. Microscopic slides of lung, kidney, stomach, intestine, pancreas, gonad of Frog, *Uromastix*, *Columba* and Rat.
3. Preparation of different development stages of Chick.
4. Study of cartilage development in limbs/whole embryos (8 to 12 days of incubation) by Alcian green stain.
5. *In vitro* culture of early chick embryos.

THEORY :
PRACTICAL:

Max. Marks: 100
Max. Marks: 100

Discipline Specific Elective Course (DSE Course)

ZOO7001T - Cell Biology and Genetics

Learning objective of the course

The course for the cell biology and genetics is exchanging the knowledge about structure of cell organelles and basic idea of genetics.

Unit 1: Characteristics of prokaryotic and eukaryotic cells, Characteristics of cell membrane molecules, fluid-mosaic models of Singer and Nicolson, passive and active transport, Structures and functions of endoplasmic reticulum, ribosome, Golgi complex, lysosome, mitochondria, centriole, microtubules and nucleus.

Unit 2: Structure of Chromatin and Chromosomes, semiconservative mechanism of replication, elementary idea about topoisomerases, replication forks, leading and lagging strands, RNA primers and Okazaki fragments, RNA structure and types, mechanism of transcription, Genetic Code and protein synthesis.

Unit 3: Interphase nucleus and cell-cycle including regulation.

Mitosis: Phases and process of mitosis, structure and function of spindle apparatus, Theories of cytokinesis.

Meiosis: Phases and process of meiosis, synaptonemal complex, formation and fate of chiasmata recombination and significance of crossing over.

Unit 4: Mendelism: Brief history of genetics and Mendel's work: Mendelian laws, their significance and current status, linked gene inheritance.

Chromosomal aberration: Structural - translocation, inversion, deletion and duplication; Numerical - haploidy, diploidy, polyploidy, aneuploidy, euploidy, polysomy and genetic implications.

Unit 5: Genetic interaction: supplementary genes, complementary genes, duplicate genes, multiple gene interaction, ABO blood groups and their genotypes, Multiple alleles.

ZOO7001P - Practical

1. Identifications of different stages of Mitosis.
2. Identifications of different stages of Meiosis.
3. Demonstration of amylase enzyme activity in animal tissue/saliva
4. Determination of blood groups and Rh-factor.
5. Study of nucleus morphology of mammalian blood sample.
6. Osmotic effect of RBC
7. Problems regarding Mendal's laws (i) Monohybrid (ii) Dihybrid crosses.

Professor & Head
Department of Zoology
Faculty of Science
J.N.V. University, Jodhpur

8. Temporary acetocarmine squash preparations and study of chromosomes.
9. Experimental Zoology:
 Test for Protein : Biuret
 Test for Lipids : Sudan IV
 Test for Carbohydrates : Benedict's
10. Catalase enzyme activity
11. Osmotic effect of RBC

ZOO7003T : Ecology and Behaviour

THEORY :
PRACTICAL :

Max. Marks: 100
Max. Marks: 100

Discipline Specific Elective Course (DSE Course)

ZOO7003T - Ecology and Behaviour

Learning objective of the course

The course for the Ecology and Animal behavior is exchanging the knowledge about animal habitat and various behavioral activities.

- Unit 1:** Introduction of ecology, definition, history. sub division and scope of ecology. Environmental factors; physical factors- soil, water, air and temperature. Biotic factors- interspecific and intraspecific relations, neutralism, mutualism, commensalism, antibiosis, parasitism, predation, competition. Concept of limiting factors, Liebig's law of minimum, Shelford's law of tolerance, combined concept of limiting factors.
- Unit 2:** Population and community ecology, measurement of population density. Factors affecting population growth, growth factors, dispersal, characteristic of community, concept of ecosystem and niches. Food chain, food web, Ecological pyramid. Energy flow in an ecosystem, biogeochemical cycles of CO₂, N₂, O₂, S and P. Prospects and strategies of sustainable development.
- Unit 3:** Brief introduction to the major ecosystem of the world and ecological succession, conservation of natural resources; Ecology in relation to Thar desert.
Brief account of environmental pollution, global warming and its impact upon Human race.
- Unit 4:** General survey of various types of animal behaviour; Methods of studying animal behaviour, Role of hormones and pheromones in behaviour, Biological rhythms.
- Unit 5:** Learning and Memory – Conditioning, Habituation, Insight learning, Association learning, Reasoning and Communication; Wildlife of Rajasthan and its conservation.

ZOO7003T - Practical

1. Demonstration of working of pH meter.
2. Demonstration of working of colorimeter.
3. Estimation of pH of Soil and water samples.
4. Measurement of temperature and relative humidity.
5. Estimation of soil moisture.
6. Estimation of water holding capacity of different soils.
7. Ecosystem study : Aquarium.
8. Pond water study to identify zoo-planktons and their permanent preparations
9. Chemotaxis activity of cockroach
10. Phototaxis activity of tribolium

ZOO7004T : Applied Zoology

THEORY :

Max. Marks: 100

PRACTICAL :

Max. Marks: 100

Discipline Specific Elective Course (DSE Course)

ZOO7004T - Applied Zoology

Learning objective of the course

The course for the Applied Zoology is exchanging the knowledge about application of Zoology in society and well being.

Unit 1: Poultry keeping – Types of poultry breeds, poultry housing, farm and farm management, system of poultry farming; Grading, handling and marketing of eggs. Poultry diseases and Vermiculture; Methodology and products.

Unit 2: Sericulture : Different kinds of silk producing insects in India and its potentialities. Host plants of silk insects. Grainage, rearing and life cycle. Breeding and various diseases of silkworm. Reeling and fibre technology. Economics of sericulture.

Unit 3: Apiculture : Different kinds of honey bees found in India and, their identification. Identification of Queen, worker and drone. Importance of keeping bees in artificial hives and different kinds of hives. Care and management of bee colonies. Bee enemies and their control. Extraction and processing of honey from the comb. Utility and economics of production of honey. Honey bees and pollination strategy in agricultural crops.

Unit 4: Pest Management : Insect pests of important crops (cotton, Rice, sugar cane& pulses), insect pest of veterinary and medical importance, pest outbreaks and assessment of losses caused by the insect pests on crops; population dynamics of insect pests; Principles of Biological, mechanical and cultural methods of pest control. Integrated Pest Management (IPM). Principles of pest control by pesticides.

Important vertebrate pests; birds and mammals with special reference to rodents and their management.

Unit 5: General principles of aquaculture; transportation of fish seed and brooders. Induced Breeding, Composite fish culture, Lay out of fish farm and its management, By-products of fishing industry; Prawn culture; Management of water bodies for aquaculture.

ZOO7004P – Practical

1. Study of different spraying and dusting equipment.
2. Use of pesticides and precautionary measures.
3. Permanent preparation of any two stored grain pests.
4. Permanent Preparation and Identification of parasitic insects.
5. Honey bee : Permanent preparation of pollen basket and mouth parts
6. Permanent preparation of mouth parts of mosquito, termites and cockroach
7. Model/ Project report based upon study of Poultry keeping/ Sericulture/ Apiculture/ Pest Management
8. Diagrammatic representation of nervous system of cockroach

B.Sc. VIth Semester
ZOO7002S(SEC):Zoology: Skill Course IV – Eco-wildlife Tourism

(30 hrs.)

THEORY:

Unit 1 : Climate and wildlife of desert; cultural heritage; bird watching; wildlife trekking; desert National Park.

Unit 2 : Fauna of Thar desert and its conservation; sacred grove; role of humans in environmental protection.

Unit 3 : Environmental impacts with special reference to wildlife; environmental awareness; clean India campaign.

PRACTICAL :

1. Study of wildlife rich area, Jodhpur fort, other sites of cultural heritage, local field visit to carry out assignment.
2. skill development for nature interpretation.
3. Trekking and camp managing.
4. Identification of local fauna.

Suggested Reading Materials (All latest editions)
